Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed September 22, 2003. Claims 1 was amended and claim 6 was canceled rendering claims 1-5, 8-16, 18-21 and 23-29 pending.

Claim Rejections – 35 USC § 103(a)

2. Claims 1-5, 8-16, 18-21 and 23-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kroll et al. (U.S. 6,432,547) for reasons previously stated in the Office Action submitted on March 17, 2003. Regarding the newly added limitation to claim 1, 'wherein the film ... has been stretched from about 100 to about 500 percent of its original length to provide a water vapor transmission rate greater than about 1500 g/m²/24 hrs,' Kroll shows wherein the film is has a water vapor transmission rate of at least 100/g/m²/day (Abstract). Although Kroll does not specifically disclose stretching the film, it would have been obvious to one of ordinary skill in the art to stretch the film of Kroll since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237.

Response to Arguments

3. Applicants arguments of rejection under 35 USC 103(a) as being unpatentable over Kroll et al. (U.S. 6,432,547) have been considered but are unpersuasive. Applicant argues nowhere does Kroll mention or suggest a stretched film that provides certain water vapor transmission rates and elongation at break properties. Although Kroll does not specifically disclose stretching the film, it would have been obvious to one of ordinary skill in the art to stretch the film of Kroll since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237. Additionally, a stretched film providing certain properties is held to be an intended use of the film. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).
